Dear Parent/Guardian:

This notice is to inform you that CONJUNCTIVITIS (also known as “pink eye”) has been diagnosed in a child at this Head Start Center. This condition is contagious; therefore, we would like you to watch for symptoms in your child. The symptoms are as follows:

EYES CRUSTED CLOSED AFTER SLEEPING; GREEN GOOPY DISCHARGE FROM EYES; RED, WATERY, ITCHING OR BURNING EYES.

If your child should develop one or more of these symptoms, please notify your child's health care provider and your child's teacher. Medical treatment should be carried out as recommended by your child's medical health care provider. A child diagnosed with Conjunctivitis can return to the classroom after 24 hours of medical treatment has been completed and symptoms are resolved. We are attempting to limit the spread of this illness/condition, and your cooperation is sincerely appreciated.

If you have any questions about this information, contact your child's teacher at the individual centers or the Head Start Health Services Director (541) 564-6878. Thank you for your time and cooperation in this matter.

Sincerely,

Head Start Teacher

Amy Hendrix
Health Services Director
